

SQL PROJECT- MUSIC STORE DATA ANALYSIS

- 1) Who is the senior most employee based on job title?
- 2) Which countries have the most Invoices?
- 3) What are top 3 values of total invoice?
- 4) Which city has the best customers? We would like to throw a promotional Music Festival in the city we made the most money. Write a query that returns one city that has the highest sum of invoice totals. Return both the city name & sum of all invoice totals.
- 5) Who is the best customer? The customer who has spent the most money will be declared the best customer. Write a query that returns the person who has spent the most money.
- 6) Write query to return the email, first name, last name, & Genre of all Rock Music listeners. Return your list ordered alphabetically by email starting with A.
- 7) Write a query that returns the Artist name and total track count of the top 10 rock bands.
- 8) Return all the track names that have a song length longer than the average song length. Return the Name and Milliseconds for each track. Order by the song length with the longest songs listed first.
- 9) Find how much amount spent by each customer on artists? Write a query to return customer name, artist name and total spent
- 10) We want to find out the most popular music Genre for each country. We determine the most popular genre as the genre with the highest number of purchases. Write a query that returns each country along with the top Genre. For countries where the maximum number of purchases is shared return all Genres
- 11) Write a query that determines the customer that has spent the most on music for each country. Write a query that returns the country along with the top customer and how much they spent.
